JUAN CORONA ENRIQUEZ

MECHANICAL ENGINEERING STUDENT

Grand Junction, CO | Willing to Relocate | 970-697-3511 | juancorenr4@gmail.com
www.linkedin.com/in/mecengineering-juancorenr

EDUCATION

University of Colorado Boulder | BS in Mechanical Engineering Expected May 2028

Relevant Coursework: Engineering Design & Prototyping, Materials Science, Mechanics of Materials, Numerical Methods, Statics, Dynamics, Thermodynamics, Fluid Mechanics, Circuits and Electronics

TECHNICAL SKILLS

Design & Fabrication: SolidWorks, Fusion 360, CAD modeling, 3D printing, PETG-CF components, mechanical assembly, aluminum extrusion

Testing & Analysis: Functional testing, iterative prototyping, tensile testing, Vickers and Rockwell hardness testing, material property analysis, technical documentation

Programming & Languages: C++, HTML, CSS, JavaScript | Spanish (native), English

ENGINEERING PROJECTS

Claw Machine Design & Prototype | Engineering Design Project Mar-May 2025

- Designed and fabricated a 3-axis claw machine using **SolidWorks**, **3D printing**, PETG-CF brackets, aluminum extrusion, and plexiglass; carried the design from CAD through assembly and testing.
- Integrated two manually driven axes, a motorized vertical axis, and a pneumatic claw; used iterative prototyping and **functional testing** to refine the assembled system.
- Coordinated design, fabrication, assembly, and testing with a five-person team to complete a first-place project.

Materials Testing & Manufacturing Analysis | Materials Science Laboratory Jan-May 2025

- Performed tensile, **Vickers hardness**, and **Rockwell hardness** testing to evaluate mechanical properties and the effects of material processing.
- Analyzed 4140 steel across **heat-treatment** conditions and two carburizing durations; documented material performance, test procedures, and engineering conclusions in technical reports.

Trebuchet Engineering Challenge | Colorado Mesa University Spring 2024

- Designed, constructed, and tested a mechanical launching system using physics-based analysis; refined performance under changing constraints and placed first among 25 teams.

PROFESSIONAL EXPERIENCE

Certified Pharmacy Technician | Intermountain Health St. Mary's Hospital Jun 2026-Present

Grand Junction, CO

- Maintain inventory accuracy and operational readiness across 100+ Omnicell automated medication dispensing systems to support timely medication availability.
- Set up and operate a TPN compounder during sterile compounding shifts, following established equipment preparation, cleaning, and safety procedures.
- Coordinate **medication procurement**, ordering, receiving, and inventory monitoring across multiple pharmacy technology systems to support daily operations.
- Train technicians on equipment, workflows, and department procedures; collaborate with healthcare professionals to support safe and accurate daily operations.
- Prepare patient-specific medications for pharmacist verification, maintaining packaging, labeling, and documentation accuracy while following USP standards.

ACTIVITIES & AWARDS

Society of Hispanic Professional Engineers National Convention | Planned Attendee Oct 2026

Seal of Biliteracy | Palisade High School May 2021
