

JUAN CORONA ENRIQUEZ

MECHANICAL ENGINEER STUDENT

970-697-3511 | Juancoren4@gmail.com | Grand Junction, CO, USA (Willing to Relocate)

LINKEDIN: www.linkedin.com/in/mecengineering-juancoren

Education

University of Colorado Boulder

Grand Junction, CO

Bachelor of Science, Mechanical Engineering

May 2028

Relevant Coursework: Statics, Dynamics, Mechanics of Materials, Engineering Desing & Prototyping, Thermodynamics, Computational Methods, Fluid Mechanics, Circuits and Electronics

Professional Experience

Intermountain Healthcare St. Mary’s Hospital

Grand Junction, CO

Certified Pharmacy Technician

July 2022 – Present

- Managed inventory and operational readiness across 80+ automated medication dispensing systems (Omnicell)
- Maintained strict compliance with USP and healthcare regulatory standards
- Support sterile compounding operations during IV shifts, including setting up and operating a TPN compounder while following established sterile preparation, cleaning, and safety procedures.
- Regularly train and support pharmacy technicians on department procedures, workflows, pharmacy technology, and daily responsibilities, helping team members develop the knowledge and confidence to work independently
- Collaborated with nurses, pharmacists, and physicians to maintain efficient patient-care operations
- Developed strong attention to detail and process discipline transferable to engineering environments

Fred Loya and National Insurance

Grand Junction, CO

Customer Sales Representative

September 2021– June 2022

- Delivered structured problem-solving support to clients and resolved service issues
- Communicated technical information clearly to diverse customers
- Assisted in onboarding and training new team members

Engineering Projects

Trebuchet Engineering Challenge (ENGR 140) - Colorado Mesa University

Spring 2024

- Designed and constructed mechanical launching system applying physics-based analysis
- Tested and refined system performance under changing constraints
- Achieved 1st place among 25 engineering teams

Mechanical Claw Machine Engineering Project (ENGR 140) - Colorado Mesa University

Spring 2024

- Collaborated on mechanical design, assembly, and testing of functional claw machine system
- Applied mechanical design principles including motion systems and structural considerations
- Supported full development cycle from concept through testing and presentation

Skills & Interests

Technical: CAD Modeling (SolidWorks / Fusion 360), HTML, CSS, JavaScript, C++, Technical Documentation

Language: Spanish (Native), English

Interests: Formula 1 (aerodynamics & performance engineering), Fútbol, Artificial Intelligence, Outdoors (Fishing, Hiking, Rafting)
